

Recruit, Manage, and Screen Volunteers

Robust Volunteer Management

Volunteer Management and Screening (VMS) makes managing volunteers more efficient for organizations. Quickly create volunteer needs, easily recruit volunteers/donors, and compliantly and thoroughly screen volunteers - without ever having to leave Salesforce!

Keep your organizations safe with built-in background screening from Verified First—an award-winning provider for client satisfaction.

VMS was **built for non-profits** that are currently utilizing Salesforce for their volunteer needs. VMS takes volunteer management to the next level by providing organizations with an easy way to manage every aspect of their volunteer management needs:

- Easily **recruit** volunteers, **manage** volunteer needs, **track** activities, and **develop** volunteer profiles
- **Built-in background screening** enables organizations to order and track screens on volunteers within Salesforce
- VMS **leverages your current Salesforce** setup and can easily migrate contacts over to the VMS platform

The **BACKGROUND SCREENING PRODUCTS** and services VMS offers:

- ✓ Criminal Background Checks
- ✓ Civil Records
- ✓ MVR and DOT Reports
- ✓ Text Messaging
- ✓ Identity Services
- ✓ Credit and Financial
- ✓ Drug Screening
- ✓ Verifications
- ✓ Form I-9 and E-Verify

Volunteer Management and Screening provides robust volunteer management capabilities. Users can **create custom volunteer needs** to specify exactly what they're looking for and how many volunteers they're need.

Users can also create custom emails within the VMS app and leverage their volunteer and/or donor lists to **fill quickly and easily invite** people to volunteer.

Verified First has cracked the nut on how to deliver better background screening experiences to organizations—one that's **faster, easier, more affordable, and more accessible.**

Our background screening solution provides a **full integration** with Salesforce, enabling users to utilize full Verified First functionality within Salesforce to place orders, automate processes, and report data.
